

In the Specification:

Please amend paragraphs [0014] and [0042] to read as follows:

[0014] Fig. 2 is an enlarged sectional view of the catheter lumens of the catheter assembly taken along lines 2-2 of ~~Figs. 1 and 7.~~ Fig. 1 and 7.

[0042] Referring back to Fig. 7, the proximal portion 112, 132 of each of the first and second catheters 110, 130 includes a first transition portion 186 and a second transition portion 188, respectively. These transition portions 186, 188 comprise a change in the cross sectional profile of the first and second catheters 110, 130. Specifically, distally of the first transition portion 186, the first catheter 110 has a generally semi-circular cross section 128, as shown in Fig. 2, whereas proximally of the first transition portion 186, the first catheter 110 has a generally [[oval]] circular cross section 126, as shown in Fig. 8. Similarly, distally of the second transition portion 188, the second catheter 130 has a generally semi-circular cross section 148, whereas proximally of the second transition portion 188, the second catheter 130 has a generally circular cross section 146. The first transition portion 186 and second transition portion 188 are located in the very near proximity of the proximal end 182 of the splittable bond 180. The first generally flat surface 124 and second generally flat surface 144, that are joined by the splittable bond 180, each end at the first transition portion 186 and second transition portion 188.
